

DOGBONE

Excellent Global Performance even on Difficult-To-Tag Materials

SMARTRAC's DogBone inlays and tags are designed for global supply chain, industrial, RTI and sports timing applications, and offer excellent performance in demanding environments and on different materials.

DogBone inlays and tags have good tolerance against the detuning effect of high-electric materials, providing effective global performance even on difficult-to-tag materials. They are now available with the Impinj Monza R6 chip that comes with an Autotune feature, which helps the DogBone product to work at peak efficiency, even in rapidly changing environments. DogBone with the Monza R6 chip offers unique TID and enables pre-serialized EPC.

The inlay is size-optimized for 10 cm / 4 inch wide converted labels, and is available in dry, wet and paper tag delivery formats.

SMARTRAC's inlays and tags are compliant with ISO 9001:2008 Quality Management and ISO 14001:2004 Environmental Management, which ensure a reliable and state-of-the-art product that meets a variety of application needs, enhancing RFID usage for difficult-to-tag materials.
